

ALEX MERCER

Austin, TX | (512) 555-0199 | alex.mercer.dev@email.com | github.com/alexmercer-dev

PROFESSIONAL SUMMARY

Detail-oriented Junior Python Developer with solid foundational experience building RESTful APIs and managing relational data systems. Adept in clean-architecture software development workflows using FastAPI, PostgreSQL, and Pydantic validation layers. Eager to apply backend infrastructure knowledge to downstream Generative AI engineering projects.

TECHNICAL SKILLS

Languages: Python (3.10+), SQL, JavaScript, HTML5/CSS3

Frameworks & Tools: FastAPI, Uvicorn, SQLAlchemy ORM, Pydantic, Flask, Git/GitHub, Docker

Databases: PostgreSQL, SQLite, Redis

PROFESSIONAL EXPERIENCE

Junior Backend Engineering Intern

TechSoft Solutions | Austin, TX (Remote) | Jan 2025 - Present

- Developed and optimized 15+ internal REST API endpoints utilizing FastAPI and Uvicorn frameworks.
- Implemented strict request and response validations using Pydantic BaseModel schemas to prevent data corruption.
- Wrote explicit SQL statements and migrations within SQLAlchemy ORM to manage relational table schemas.
- Reduced database query latency by 12% by indexing critical transactional foreign keys inside a PostgreSQL database.

Freelance Scripting & Automation Developer

Self-Employed | Remote | May 2024 - Dec 2024

- Built customized web scraping pipelines using Beautiful Soup and Requests to aggregate retail pricing metrics.
- Designed automated data-cleaning scripts that converted messy unstructured raw files into cleanly formatted CSV records.

PROJECTS

Decoupled Local Expense Tracker API (GitHub)

- Designed a robust, multi-layered REST backend application leveraging FastAPI, SQLAlchemy, and a PostgreSQL storage layer.
- Secured application variables by parsing operating system parameter keys completely isolated from git repositories using an `.env` file structure.

Few-Shot Dynamic Sentiment Classifier

- Created a standalone local Python utility executing unstructured text sentiment extraction utilizing targeted engineering techniques.

EDUCATION & CERTIFICATIONS

B.S. in Computer Science - University of Texas at Austin | Graduated May 2024

Bootcamp Certification: Generative AI and LLM Application Engineering (Udemy, 2026)
